

MAGGIE NAN

UX DESIGNER + DEVELOPER

ABOUT

My name is Zhe Nan, and you're welcome to call me Maggie:

During the past 15 months, I have been worked as frontend/full-stack developer. This experience has given me strong logical thinking and analytical skills, but I've been always kept the faith that I will be a User Experience designer someday.

Three years ago, my passion about UX Design drove my way from Electronics Engineering to Information Science; this time, I want to take a step further and make it my lifelong career.

WORK EXPERIENCE

2015.11 **YELP** San Francisco, CA

- Present **Full-Stack Developer**

- Implemented the DE Header Experiment with python, javascript and css, built cohorts of dropdown menus in nav bar & created metrics in Google Analytics for A/B testing
- Improving UX culture at Yelp as a core member of the usability group, hosting weekly office hour, taking charge of UsabilityHub experiments and persona interview scripts

2015.03 **INTERSYSTEMS** Cambridge, MA

- 2015.10 **Frontend Developer**

- Created the Twitter Bootstrap plugin from scratch for Zen Mojo with Caché ObjectScript and JavaScript
- Implemented a calendar web application on top of InterSystems Caché database, using Node.js and its Express framework

2014.06 **BIO-RAD** Hercules, CA

- 2014.08 **UX Design Intern**

- Conducted competitive usability evaluations and interviews with 20 internal stakeholders & 10 customers for insights to redesign product webpage for T100™ Thermal Cycler
- Created low-fi and hi-fi prototypes iteratively based on Customer Journey Mapping, Behavior Variables Persona Design and Usability testings
